Andrew Ambrosino

Founder, Product Leader, Design Engineer

	Noyo →
2025–	Head of Product
2023–	Head of Frontend Engineering & Product Design

- Led a team of ~8 in product and ~25 in engineering (total team of ~80)
- Led product development and launch of BenefitsOS, AI Canvas, Dynamic Mapping, Unified Issues, Workday Benefits Copilot, Discrepancies, Carrier Network, EDI carriers, API Logs, and numerous other new features at high leverage
- Doubled customers and grew policies 50% YoY (on existing products)
- Created new AI team to leverage generative AI in-product; built initial AI prototypes
- Migrated company to Linear for unified roadmapping and operational workflows. Dramatically increased shipping velocity across the company.
- Designed and built new customer-facing web app from first principles. Aligned product across external customers and internal ops teams to unify experience.
- Introduced new architecture designed to consolidate a multi-gen set of React codebases. Built GraphQL server to unify the API schema across ~15 services for rapid development.
- Designed and built new company website and new API documentation
- React, Next.js, Shadcn/Radix/Tailwind, GraphQL w/Apollo, AI/LLM/AI SDK, Typescript, OpenAPI, Postgres w/Drizzle, Figma/Linear/Notion

2016–23	**Catch** →

Founder, CTO, CPO, President, Board Chair

- Founded the company; raised seed and series A ($20M); sold the company
- Built and led the product, engineering, and design teams
- Built the only B2C company with the technical capability and regulatory approval in banking, investing (retirement), and health insurance (via EDE)
- Built a feature set and design direction that has since been directly copied by Gusto, Square, Cash App, Wealthfront, Found, and more
- YCombinator W19
- React, React Native, React Native for Web, GraphQL w/Apollo, Typescript, Gatsby, Terraform, Figma/Linear/Notion, BaaS
